Ranges

Combining function and modern simplicity, Bosch ranges lighten the day's burden to serve as the kitchen's daily companion. German engineered for precision and reliability, they perform tirelessly to bring ease and joy to cooking. Our gas, dual-fuel, induction and electric ranges offer a multitude of ways to cook, with a variety of features that lend speed and efficiency. Now routine tasks like preheating, boiling water and sliding pots are suddenly made more effortless. The oven features Genuine European Convection to cook faster, while innovative cooking methods like induction make cooking easier. Now routine tasks like preheating, boiling water and sliding pots are suddenly made more effortless. With a simple slide-in design and sleek, uncomplicated aesthetic, Bosch ranges are designed to feed both body and mind.

Benchmark® Ranges

Bosch slide-in ranges are available in induction, electric, gas or dual-fuel.

Slide-in design

Our convenient, slide-in design lends an instant, built-in look to any kitchen.

QuietClose® door

Our QuietClose® doors never slam shut, instead closing smoothly and effortlessly for stress-free cooking.

Genuine European Convection

The dual-fuel, electric and induction ovens feature Genuine European convection for even baking results on all three racks.

Induction

Faster, more efficient cooking

Induction offers faster cooking and more precise temperature control, resulting in greater speed and efficiency.

Electric

Flexible cooking options

With 5 burners, including a 12" 3,000-watt triple-ring heating element, our Benchmark® electric range gives you the ultimate flexibility when cooking.

Gas / Dual-Fuel

Dual-stacked burner

Our gas and dual-fuel ranges feature a powerful 20,000 BTU center, dual-stacked burner that delivers faster boiling and low simmering for greater cooking flexibility.

Benchmark® Induction Slide-in Range

HIIP055U (Induction)

- Full-Depth Slide-in Range
- Innovative Induction Technology Offers Precise, Fast and Efficient Cooking
- FlexInduction®
- **+** PowerMove
- QuietClose® Door
- SpeedBoost®
- Temperature Probe
- Warming Drawer
- 4.6 cu. ft.

Ventilation

Bosch's inventive ventilation systems keep mealtime fresh by quietly purifying the air while you cook. They're beautifully designed to seamlessly integrate into any kitchen with under-the-cabinet, chimney, island, pull-out and downdraft styles. These trusted, easy-to-clean ventilation systems come with automated features to make maintenance and operation a breeze. You'll breathe easier knowing that smoke, steam, grease and odors are quietly and effectively taken care of.

Benchmark® Ventilation

Modern design

Sculpted in steel and glass, our Benchmark® wall mounted chimney hoods add style and sophistication to the kitchen. No matter your needs, Bosch has an elegant solution.

Quiet

The Benchmark® glass canopy chimney hood is only 2.5 sones at the lowest setting, so you can enjoy peaceful cooking with no distracting noise.

Powerful ventilation

With 600 CFM of power, our Benchmark® glass canopy chimney wall hood meets the ventilation requirements of any Bosch cooktop or range, and can convert to recirculation for installations that are hard to duct or for areas with make up air restrictions. These highly effective vents quickly clear the air of grease, steam, smoke, and odor.

Dishwashers

From their legendary quiet performance to their promise of sparkling clean dishes, Bosch dishwashers deliver a lasting quality you've come to trust and expect. As the quietest dishwasher brand in the U.S.,* Bosch dishwashers bring peace and quiet to the kitchen. And now with the industry's largest 3rd rack loading capacity,** The MyWay™ rack lends a new level of loading ease. Plus, our Rackmatic® adjustable middle racks and FlexSpace™ tines offer even more flexible loading options. Discover how Bosch dishwashers are flexible enough to handle whatever life brings.

*Based on an average of sound ratings of 24" Full Size Stainless Steel Tub dishwashers contained in major brands websites. Major brands defined as TraQline Top 5 Market Share December 2016.
**Versus major brands with a 3rd rack. Major brands defined as TraQline Top 10 Market Share. June 2016.

Benchmark® Dishwashers

MyWay™ rack

The largest, most versatile 3rd rack of its kind, MyWay™ easily fits more of your larger, deeper items like cereal bowls, freeing up extra space for oversized items in the bottom rack.

Ultra-quiet performance

Our quietest dishwasher line, Benchmark® models offer near-silent performance with models as low as 38 dBA. (Available on select Benchmark® models only)

EasyGlide™ rack system on all three racks

Smooth-rolling ball bearings add a smoother glide to all three racks, so you get a more premium feel with every pull—even when the rack is fully loaded. (Available on select Benchmark® models only.)

FlexSpace™ plus tines

FlexSpace™ Plus gives you complete flexibility. Either fold down every other tine in the row or fold them all down—to create space to load larger dishes such as pasta bowls or even small frying pans more efficiently. (Available on select Benchmark® models only)

Interior light

A bright white interior light adds an aesthetic accent in the kitchen and makes loading easier in dim lighting. (Available on select Benchmark® models only)

TimeLight®

Shines the amount of time remaining in the cycle right on the floor. (Available on select Benchmark® models only)

Water softener

A built-in water softener removes hard water spots caused by lime deposits, softening the water to the appropriate level to ensure spot-free, shiny dishes. (Available on select Benchmark® models only)

TFT display

The full-color TFT control is intuitive and easy to use, while also matching the other Bosch products in the Benchmark® kitchen. (Available on select Benchmark® models only)

Refrigerators

Healthy living starts with consuming fresh ingredients, and our Bosch refrigerators are designed to keep foods at their optimal freshness, maintaining their intended nutrients and flavor. Bosch refrigerators feature VitaFresh® to preserve your favorite foods, by keeping fruits and vegetables fresher longer. Bosch refrigerators blend peacefully into any kitchen space and install as flush, counter or standard depths. Thoughtful features like premium tempered glass, hidden hinges and crisp LED lighting reveal a tangible level of quality enjoyed with everyday use.

Benchmark® Refrigerators

Beautiful flush design

The Bosch built-in refrigerator offers the ultimate integrated look for your kitchen. The unique Optiflex® hinge design allows for flush installation, for a true European-style integration with your kitchen cabinets.

Custom panel

Bosch offers custom panel refrigeration units, enabling each unit to seamlessly blend in with the kitchen cabinetry.

Flexible configurations

Bosch built-in refrigerators are designed to give you ultimate flexibility when designing your kitchen. Install a 36" French-Door Bottom Freezer unit or combine refrigerator and freezer columns for a larger 48" unit or an extra-large 60" double-fridge or fridge-freezer unit.

Dual compressors & evaporators

Bosch built-in refrigerators feature a separate compressor and evaporator in the refrigerator and freezer sections, optimizing freshness. Not only does it provide more accurate temperature and humidity control, it also helps to prevent freezer burn and odor transfer.

ENERGY STAR® qualified

Our energy efficient Benchmark® refrigerators are designed to use less energy without sacrificing features.

Planning Checklist

Benchmark® Built-in Refrigeration
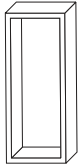

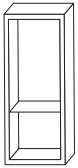

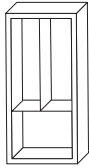

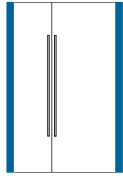

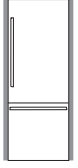

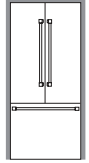

This custom product requires attention to the finest details. Did you remember to...?

☐ Choose a desired configuration – side-by-side or stand-alone columns (See page 186 for details)

☐ Plan the cutout height(s) – 84" (See pages 177, 179 and 181 for details)

☐ Plan the cutout width(s) – depends on configuration and column width (See pages 177, 179, 181 and 188 for details)

☐ Plan the cutout depth – 25" for North American style cabinets, 24" with installation frame accessory, 24" for European style cabinets (See page 189 for details)

☐ Ensure the cutout interior (top and sides) is flush to the appliance at a depth of min. 4", preferably 6" from face frame (See pages 177, 179, 181 and 189–190 for details)

☐ Ensure the cutout interior returns (top and sides) are finished to match exterior at a depth of min. 4", preferably 6" from face frame (See pages 177, 179, 181 and 189–190 for details)

☐ Ensure proper clearance for appliance doors including handle(s) – check for interference with other appliances, open or closed cabinets and doors, nearby walls (See page 188 for details)

☐ Properly site the electrical outlet and (if applicable) water box (See page 187 for details)

☐ Ensure the reverse of any custom panel is finished to match the exterior

☐ Choose the toekick style – stainless (included with appliance) or design custom toekick(s) (See page 191 for details)

☐ Procure the proper installation accessories – stainless steel frame kit (FRAMKITB80) for framed installations in 24-inch deep cutouts, heater kit (HEATKITB80) for installations where two appliances are installed side-by-side or instances where any appliances are installed less than 6" apart from another but not connected. The heater kit is also recommended for use with any installation in areas that are subject to humidity, or located next to an outside wall. (See page 184 for details)

☐ If applicable, procure the proper water filter accessories – additional replacement filters, filter by-pass for in-home water filtration system (See page 184 for details)

Build Your Custom Column

Benchmark® Built-in Refrigeration

① **Choose Unit**	② **Choose Panel**	③ **Choose Handle and Accessories** (Units install either completely flush or framed with optional kit)
Single Door Refrigerator		
30" B30IR800SP Reversible Swing Custom Column	BFL30IR800 Flat Stainless Steel	00684212 36" handle, coordinates with Bosch appliances. Choose one handle for each single door unit. (Must be ordered from Service) FRAMKITB80 This accessory enables installation in 24-inch deep cutouts. Kit includes two identical and reversible vertical frames.
Single Door Freezer		
18" B18IF800SP Reversible Swing Internal Ice Maker Custom Column	BFL18IF800 Flat Panel Stainless Steel Custom Panel Ready	HEATKITB80 When two single door units are installed side-by-side, this sealing kit must be used. This kit is also recommended in installations that are subject to extreme humidity.
Bottom Freezer and French Door		
30" B30IB800SP 2-Door Custom Column	Custom Panel Ready	Bosch handles are included FRAMKITB80 This accessory enables installation in 24-inch deep cutouts. Kit includes two identical and reversible vertical frames.
36" B36IT800NP French Door Custom Column	Custom Panel Ready	
Pre-Assembled Bottom Freezer and French Door		
30" B30BB830SS 2-Door Flat Stainless Steel Panels Bosch Handles Removable Frame	Flat Stainless Steel Panels are included	Bosch handles are included A frame is attached to all pre-assembled models. It is removable if a flush installation in a 25" deep cabinet is desired.
36" B36BT830NS French Door Flat Stainless Steel Panels Bosch Handles Removable Frame	Flat Stainless Steel Panels are included	

IMPORTANT: Use a sealing kit when connecting refrigerator and freezer columns side-by-side (included with every freezer column). Use HEATKITB80 for all non-traditional side-by-side combinations, installations where columns are not connected but less than six inches (152 mm) from one another and for any installation in areas subject to excessive humidity. See page 184 for details.

Optional Accessories and Installation Considerations

Benchmark® Built-in Refrigeration

Flat Stainless Steel Door Panels

Single Door Refrigerator
BFL30IR800 (For Model B30IR800SP)
30-Inch

Single Door Freezer
BFL18IF800 (For Model B18IF800SP)
18-Inch

Installation Accessories

FRAMKITB80 Frame Kit

Included with all pre-assembled bottom freezers, this adjustable frame is also available as an optional accessory for use with any custom column for installation in 24-inch (610 mm) deep cutouts. The kit includes two identical and reversible metal side trims whose placement between the interior cutout wall and the appliance helps overcome the challenge of unfinished cabinet returns.

HEATKITB80 Heater Kit
< 6"
(<152 mm)
Heater Kit Required

When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this kit is provided. For all other (non-traditional, i.e. two bottom freezers) side-by-side combinations or instances where any appliances are installed less than 6" (152 mm) apart from one another but not connected side-by-side, purchase this kit. This kit is also recommended for use with any installation in areas that are subject to extreme humidity.

Filter Accessories

BORPLFTR10 Water Filter

Replacement water filter for use in all freezer and bottom freezer models.

SCRNFLTR10 Filter By-Pass

Filter by-pass for use with existing in-home water filtration systems. For all freezer and bottom freezer models.

Handles

B36HNDL800 36-Inch Handle

Coordinates with Bosch appliances. Choose one handle for each single door unit. (Must be ordered from Service)

Location

The appliance should be installed in a dry, ventilated room. It may not be installed outdoors. The ambient temperature of the room must be between 55°F (13°C) and 100°F (43°C).

The appliance should not be exposed to constant direct sunlight or excessive heat. If installation next to a heat source, such as an oven, radiator, etc. is unavoidable, use a suitable insulating plate or observe the following minimum distances from the heat source:

– 1 $1/4$" (30 mm) from an electric cooking appliance,
– 11 $13/16$" (300 mm) from an oil or solid-fuel cooking appliance.

Installation And Cutout Dimensions

Please see pages 177, 179, 181 and 188–193 for complete cutout planning information.

It is important to observe the specified dimensions of the installation cutout for a trouble-free installation of the appliance and for the subsequent appearance of the door panel.

– In particular ensure that the cutout is square. Squareness can be checked by suitable means, e.g. spirit level, diagonal measurements, etc.
– The side walls of the cutout must be flush. The minimum thickness of the side and top walls is $5/8$" (16 mm). The minimum thickness of toekick panel is $1/4$" (6 mm).

Furniture / Fixtures

During installation, the appliance is fastened to adjacent and overhead furniture / fixtures and it is therefore essential that all such furniture / fixtures are well secured to the substructure or adjacent wall.

Flooring / Substructure

On account of the heavy weight of a fully loaded appliance, a load-bearing substructure is required. To ensure correct installation and function, the support must be flat, level and made of hard, rigid material. If in doubt, contact an architect or a building expert.

Refer to the following table for load-bearing capacity:

Appliance	Load Bearing Capacity
30-Inch Single Door Refrigerator	1,110 lbs. / 500 kg
18-Inch Single Door Freezer	560 lbs. / 250 kg
30-Inch Bottom Freezer	900 lbs. / 410 kg
36-Inch French Door	1,200 lbs. / 540 kg

Door Panel Dimensions

Benchmark® Built-in Refrigeration

Select Bosch built-in refrigeration appliances are designed to be equipped with a decorative door panel. A panel can be custom-made or purchased as a stainless steel accessory. The table below illustrates the dimensions of the stainless steel panel accessories and can be used as a guide in creating custom panels. At 79 $^7/_8$" (2029 mm) tall, they are designed for a toekick height of 4" (102 mm), and a total cutout height of 84" (2134 mm) yielding $^1/_8$" (3 mm) reveals. At $^3/_4$" (19 mm) deep, they are designed to attach to the 24" (610 mm) deep appliance for an overall depth of 24 $^3/_4$" (629 mm). See page 177, 179, 181 and 188–193 for cutout planning.

When using custom panels, always ensure that the panel reverse is finished to match the exterior, as parts of the panel reverse will be visible when the refrigerator door is opened.

IMPORTANT: While these sketches can serve as a general guide in planning panel dimensions, the correct panel dimensions are dictated by design choices including style and dimensions of surrounding kitchen cabinetry, case and toekick height, etc. Please ensure careful planning based on the specific kitchen design.

Single Door — Bottom Freezer — French Door
	B18IF800SP 18-Inch Single Door Freezer	B30IR800SP 30-Inch Single Door Refrigerator	B30IB800SP 30-Inch Bottom Freezer	B36IT800NP 36-Inch French Door

Installation Options

Benchmark® Built-in Refrigeration

The Bosch Built-in Refrigeration Collection offers a variety of installation possibilities*. In some instances, special accessories are required.

Recommended Installations		Considerations
Stand-Alone		Any appliance can be installed as a stand-alone unit. Ensure a cutout flush to the appliance at a depth of minimum 4" (102 mm), preferably 6" (152 mm) on the top and sides.
Side-By-Side		When two appliances are installed side-by-side a sealing kit must be used. For combinations that involve a freezer column, this kit is provided. For all other (non-traditional) side-by-side combinations or instances where any appliances are installed less than 6" (152 mm) apart from one another but not connected side-by-side, purchase the Heater Kit (HEATKITB80).
Split Columns With Partition		When dimensioning the partition, note the thickness of the door panel (including handles) as well as the swivel range to prevent damage if the doors are opened at the same time. (See page 188 for details on door swivel range dimensions) Three appliances can be installed together only if a partition — minimum $5/8$" (16 mm) — is placed between two of the appliances. Ensure that door panel thickness (including handles) as well as the swivel range are accounted for.
At The End of a Cabinetry Run		All appliances must be completely enclosed on the top and sides. If one side of the appliance is visible, a decorative side panel must be used. The side panel must be connected firmly to the wall, the floor and any overhead furniture / fixtures before the appliance is placed in the cutout.
Not Recommended		**Concerns**
		It is absolutely essential to ensure that the appliance is installed in such a way that the doors do not interfere with an adjacent wall or other kitchen elements. (See page 188 for details on door swivel range dimensions)
		A partition — minimum $5/8$" (16 mm) — is required to ensure the doors do not interfere with one another when opened. Use a partition to separate appliances and observe the door swivel range. (See page 188 for details on door swivel range dimensions)
		A French Door Bottom Freezer cannot be connected side-by-side with any other appliance. Use a partition to separate appliances and observe the door swivel range. (See page 188 for details on door swivel range dimensions)

*The Bosch warranty shall apply only to recommended installations.

Planning Information

Benchmark® Built-in Refrigeration

Electrical Specifications

The appliance comes with a 3-wire power supply cord.
UL listed in the USA.

The appliance requires a 3-wire receptacle that is fitted with a 15 Amp fuse or higher. Refer to the following table for max load details.

Appliance	Max Load
	120V AC, 60Hz
30-Inch Single Door Refrigerator	15 A
18-Inch Single Door Freezer*	15 A
30-Inch Bottom Freezer*	15 A
36-Inch French Door	15 A

*Including ice maker

The receptacle must be installed by a licensed electrician only.

For the installation position of the receptacle refer to diagram in "Electrical Location".

Grounding Instruction

This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for the electric current.

Additional Grounding Procedure

Some local regulations may require a separate ground. In such cases, the required accessory ground wire, clamp and screw must be purchased separately. Never ground the appliance to plastic plumbing lines, gas lines or water pipes.

A 4-conductor cord shall be used when the appliance is installed in an area where local codes do not permit grounding through the neutral. Power supply cord must be replaced by a licensed electrician only.

Warning

Improper connection of the equipment grounding conductor may result in electric shock. Have the appliance checked by a qualified electrician or service technician if you are in doubt as to whether the appliance has been properly grounded.

Electrical Location
Split Column Installation		
	18-Inch	30-Inch
X	18" (457 mm)	30" (762 mm)
Y	9" (229 mm)	15" (381 mm)

Side-by-Side Installation
Water Location

A cold water connection is required for appliances that feature an ice maker or an ice and water dispenser.

The water pressure must be between 40 and 120 p.s.i. (2.75–8.25 bar). The installation must comply with local plumbing regulations.

A separate shut-off valve must be installed for the appliance water connection.

The shut-off valve for the water connection may not be behind the appliance. It is recommended to place the shut-off valve outside the cutout next to the appliance or in another easily accessible location. When installing the water connection, observe the permitted installation areas for the water supply line. The supply line can be located to the right (a), to the left (b), or underneath (c).
Planning Information

Benchmark® Built-in Refrigeration

Door Swivel Range

It is absolutely essential to ensure that the appliance is installed in such a way that the doors (including handles) and adjacent cabinets, countertops, pilasters, walls or other kitchen elements do not interfere with one another when opened. The illustrations below depict the swivel range of the refrigerator doors including mounted door panels of both 3/4" (19 mm) and 1 1/2" (38 mm) thickness.

In the event of door interference the following solutions may be employed:

– Limit the refrigerator door opening angle to 90° with a door stop pin inserted into the hinge.
– Reduce the door panel thickness (if larger than 3/4" (19 mm)).
– Install a spacer between the appliance and the kitchen element that creates the interference.
– Rearrange the opposing kitchen element that creates the problem.
– Create a protruding cutout for the appliance.

Door Swivel Range – 3/4" (19 mm) Flush Appliance Door Panel
Door Swivel Range – 1 1/2" (38 mm) Flush Appliance Door Panel
Side-By-Side Installation

The cutout width for side-by-side installations is defined by adding together the dimensions of two single columns. Below are the dimensions of a classic 48" side-by-side, with an 18" freezer on the left and a 30" refrigerator on the right.
IMPORTANT: Just as with stand-alone columns, always ensure that the receptacles and the water line are correctly positioned. For dimensional requirements see page 187.
A: Area for running the water line. It is recommended the water-box be placed adjacent to the installation cutout, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed water box adjacent to the power supply socket elevated at the heights as referenced in areas A+B.
B: Area for installing the power connection
D: Opening depth of cutout, depending on kitchen design (24" minimum)

Planning Information

Benchmark® Built-in Refrigeration

Cabinetry Terms & Basic Requirements

To clarify the terms that are used in this design guide, please refer to the following definitions:

Case

This is the main body of a kitchen cabinet.

(Cabinet) Face Frame

This is a decorative frame at the front of a kitchen cabinet representing the space between cabinetry doors or drawers and is typical for North America. European style cabinets (frameless cabinetry) typically do not have a face frame.

Door Panel

Able to be fully flush integrated when installed in 25" (635 mm) deep cabinets, Bosch built-in, custom panel refrigerators are intentionally designed to be equipped with custom door panels that perfectly match surrounding kitchen cabinetry. Typical panel thickness is $3/4$" (19 mm). However, thicker panels can be accommodated to emulate the look of the visible face frame (as in overlay) or to match existing kitchen cabinetry doors. When using custom panels, always ensure that the panel reverse is finished to match the exterior, as parts of the panel reverse will be visible when the refrigerator door is opened.

Cutout (Niche)

The cutout is the cavity in which a Bosch built-in refrigerator and/or freezer is installed. The width of the cutout (18-inch, 30-inch, etc.) is dependent on the appliance(s). The total depth of the cutout is equal to the depth of the case plus face frame. It does not necessarily include the thickness of the door panel. For proper planning of cutout depth, please refer to pages 177, 179, 181 and 188–193.

Typically, the cutout for a Bosch built-in refrigerators and freezers will be 25" (635 mm) deep. When planning the cutout, it is essential that the top and side interior walls be flush to the appliance at a minimum depth of 4" (102 mm) from the outer edge of the face frame and composed of thick ($5/8$" (16 mm) minimum) material for secure installation. Also, because the case interior will be partially visible when the refrigerator door is opened, always ensure that the top and side returns are finished to match the exterior furniture at the same minimum depth of 4" (102 mm).

Appliance 24" — Cutout depth 24"
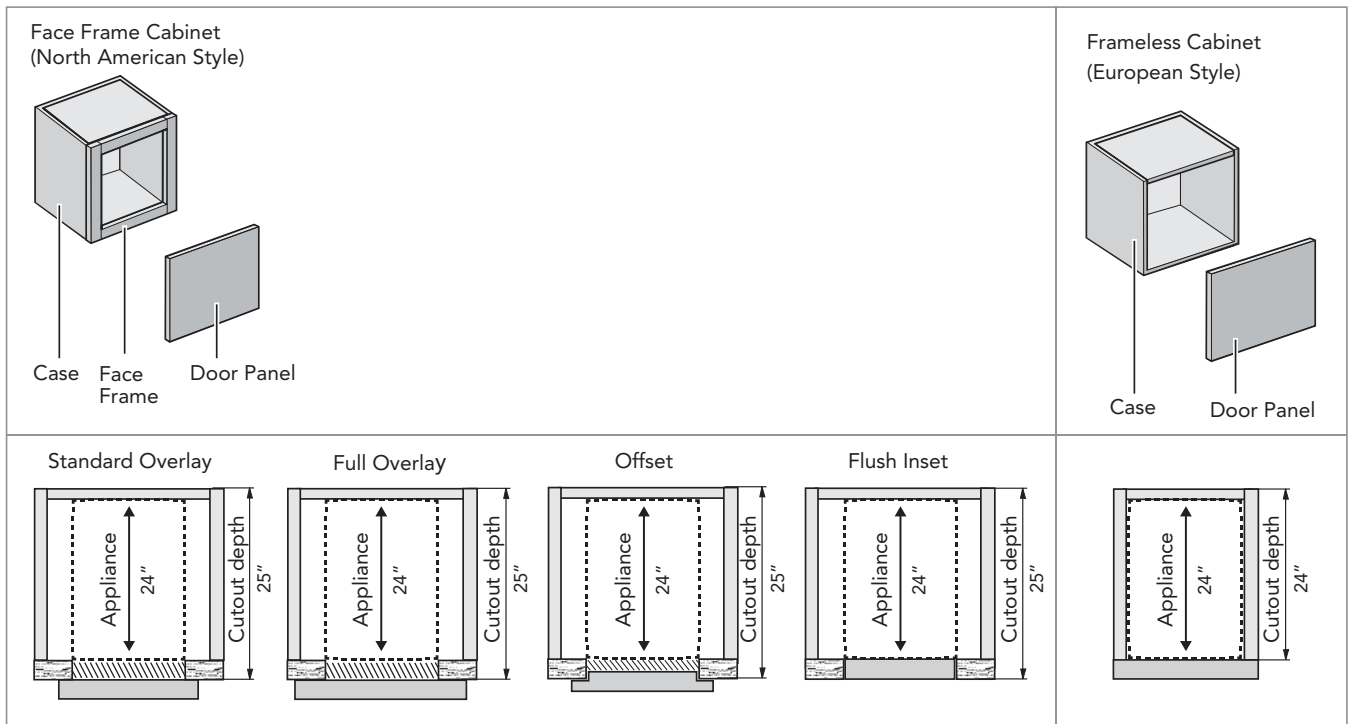

Planning Information
Benchmark® Built-in Refrigeration

Cabinetry Style & Cutout Depth

Bosch built-in refrigerators and freezers are designed to accommodate nearly any type of kitchen cabinetry door installation. Generally, when using standard ¾" (19 mm) panels, 25" (635 mm) deep cutouts are recommended but the required cutout depth depends on the desired cabinetry and custom panel execution, whether typical North American styles that employ a face frame — requiring a depth of 25" (635 mm) — or European style — requiring a depth of 24" (610 mm).

The below cabinetry styles detail requirements for the cutout and custom panel.

A) Standard (Partial) Overlay – 25" (635 mm) Cutout Depth

With standard overlay kitchen cabinetry the face frame is an important design element. In order to emulate this aesthetic for the refrigerator, one must account for the door panel thickness (typically $3/4$" (19 mm)) as well as the face frame thickness (here, also $3/4$" (19 mm)). The resulting thickness of the custom door panel is therefore $3/4$" (19 mm) + $3/4$" (19 mm) = 1 $1/2$" (38 mm). The cumulative thickness of the custom door panel requires added depth in the cutout so 25" (635 mm) is recommended (see sketch).

B) Full Overlay – 25" (635 mm) Cutout Depth

The requirements for standard overlays are also valid for full overlay designs so 25" (635 mm) cutout depth is recommended. However, especially if kitchen cabinet doors are thinner than $3/4$" (19 mm) or reveals are $1/8$" (3 mm) or smaller, a 24" (610 mm) cutout depth may also be acceptable. In this execution both the cabinet door and the small reveal of the fully overlaid face frame must be emulated within the typical appliance door panel thickness of $3/4$" (19 mm). This can be done either a) by simply ignoring the visible area of the face frame (very small reveals show virtually no face frame) or b) by creating a "nose" on the custom door panel to emulate a small visible face frame (see sketch).

C & D) Offset & Flush Inset – 25" (635 mm) Cutout Depth

Here, kitchen cabinetry door panels do not rest atop the cabinet face frame (overlay), but are instead inserted partially (offset) or fully flush (inset) into the face frame. Such offset or flush inset door panels require additional depth in the cutout. Using the example of a $3/4$" (19 mm) thick panel, the complete cutout depth would be 24" (610 mm) + $3/4$" (19 mm) = 24 $3/4$" (629 mm) and in this example 25" (635 mm) is recommended.

E) Framed – 24" (610 mm) Cutout Depth

A metal frame (FRAMKITB80) may be affixed to the side of the cabinet which conveniently hides unfinished case returns and provides a classic built-in look. This is particularly relevant for existing cabinetry that has not been custom-built to accommodate these appliances. A 24" (610 mm) cutout will result in a slightly protruding door panel for a typical built-in look.

F) European Style Kitchen Cabinetry – 24" (610 Mm) Cutout Depth

If the kitchen design is based on European style cabinetry, there is no need to emulate the look of a face frame, as such a frame is not an element of the kitchen cabinetry design. Therefore a 24" (610 mm) deep cutout with accompanying custom panel will always be sufficient.

A) Standard Overlay Design
Custom Door Panel (Emulating a Face Frame)
B) Full Overlay Design
Custom Door Panel with Nose (Emulating a Face Frame)

Split Column Installation

A: Area for running the water line. It is recommended the water-box be placed adjacent to the installation cutout, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed water box adjacent to the power supply socket elevated at the heights as referenced in areas A+B.

B: Area for installing the power connection
D: Opening depth of cutout, depending on kitchen design (24" minimum)

	X	Y
18-Inch Single Door Freezer	18" (457 mm)	9" (229 mm)
30-Inch Single Door Refrigerator	30" (762 mm)	15" (381 mm)
30-Inch Bottom Freezer	30" (762 mm)	15" (381 mm)
36-Inch French Door	36" (914 mm)	18" (457 mm)

Important

It is strongly recommended the top interior of the cutout be of solid material ($5/8$" (16 mm) thickness). Ensure that the top well is completely flush for a depth of at least 4" (102 mm).

Ensure that the side walls of the cutout are also completely flush to a depth of at least 4" (102 mm).

If, for some reason, a separate cutout cabinet is created, ensure that the furniture return is at least 4" (102 mm) deep for proper installation.

Planning Information

Benchmark® Built-in Refrigeration

Toekick & Venting Grille

Each Bosch built-in refrigeration appliance comes with a 4" (102 mm) tall stainless steel toekick. A custom-made toekick that matches the surrounding cabinetry may be applied instead. While standard toekick height is 4" (102 mm), depending on the usage of the leveling legs, the toekick height could vary. Regardless of toekick height, it is imperative that the venting grille remain unblocked to ensure proper functionality of the appliance. Decorative toekicks should be removable to allow for servicing.
Typical 4" (102 mm) toekick height. Velcro adhesive strips are used to fasten the toekick to the appliance. Venting grille and (if applicable) the water filter cavity are located above the toekick area.

Upper Molding

The planning of decorative upper molding above the cutout requires taking into account the actual or desired height of the door panel.

The overall height of the door panel will depend on:

– the height of the appliance, typically 84" (2134 mm) — leveling legs allow height adjustment ranging from -$1/2$" (-13 mm) to +1 $3/8$" (+35 mm)
– the installed height of the door panel (distance from the bottom edge of the door panel to the floor, typically 4" (102 mm), and, if desired, any extension of the custom panel above the appliance cutout)
– the appliance type (single door or bottom freezer)

Important

Please recall that a panel should be installed at a minimum height of 4" (102 mm) from the floor to allow proper ventilation of the appliance.

Always ensure that the top of the cutout or upper decorative molding is at least 4" (102 mm) deep, so that the refrigerator can be properly secured to the cutout wall. This is particularly important if a protruding cutout is specially created and configured with a face frame. Furniture returns for any face frame must be a minimum of 4" (102 mm) deep.
If required by the surrounding cabinetry design, the distance between the bottom edge of the door panel and the floor can be increased from approx. 4" (102 mm) up to 7 $1/8$" (181 mm), but should not be decreased. Note, however, that the venting grille and (if applicable) water filter cavity will be visible, even if the door is closed.
Vertical Section, Side View:

*Adjustment in leveling legs: -$1/2$" (-13 mm) to 1 $3/8$" (35 mm)

(635mm)
CUTOUT FOR 48" SIDE-BY-SIDE APPLIANCE COMBINATION, STANDARD OVERLAY CABINETRY:

In this example, the installation cutout is formed by creating a separate cutout around the appliances. It yields a look that deviates from the general kitchen design.

The custom door panel has a cumulative thickness of 1 **1/2**" (38 mm), **3/4**" (19 mm) emulating the face frame and **3/4**" (19 mm) for the actual door panel). Thus, a 25" (635 mm) deep installation cutout is required.

– cutout width is exactly 48" (for an 18" + 30" = 48" side-by-side combination)
– cutout (case) depth is 25" (635 mm) due to 1 **1/2**" (38 mm) custom door panel
– any furniture return must be at least 4" (102 mm) deep, on interior top and sides, of solid material and should be finished to match the exterior at the same depth (4" or 102 mm)

Warranty Note: Bosch warrants that the Product is free from defects in materials and workmanship for a period of three hundred and sixty-five (365) days from the date of purchase. The foregoing timeline begins to run upon the date of purchase, and shall not be stalled, tolled, extended, or suspended, for any reason whatsoever. This Product is also warranted to be free from cosmetic defects in material and workmanship (such as scratches of stainless steel, paint/porcelain blemishes, chips, dents, or other damage to the finish of the Product, for a period of thirty (30) days from the date of purchase or closing date for new construction. This cosmetic warranty excludes slight color variations due to inherent differences in painted and porcelain parts, as well as differences caused by kitchen lighting, product location, or other similar factors. This cosmetic warranty specifically excludes any display, floor, "As Is", or "B" stock appliances.
